

Setting your personal combination

Your new resettable combination padlock is present to open at 0-0-0, even though dials may appear in other numbers.

TO OPEN THE LOCK

Step 1

Turn the dials to the preset combination and align the numbers with the Guide Line.

Step 2

Hold the cable head. Slide it from left to right and pull the cable upward.

TO RESET YOUR OWN COMBINATION NUMBER

Step 1

Turn the dials to the preset combination and align the numbers with the Guide Point.

Step 2

Press and turn the Reset Button 90° clockwise with a small flathead screwdriver.

Step 3

Turn the dials to set the desired combination.

Step 4

Turn the Reset Button 90° counterclockwise back to its original position.

➤➤➤ Keep your combination in a safe and accessible place for future reference.

Note:
The Transportation Security Administration (TSA) screeners and airline check-in staff at airports are trained to recognize the Travel Sentry® logo. They understand that baggage with locks displaying this mark are permitted to remain locked. TSA screeners have access to special codes that allow them to open those locks in the event that the baggage must be opened for inspection. With Travel Sentry® Approved locks the TSA can screen checked baggage faster, without having to break open locks.
