

CATALOGUE 2024

HEPCO & BECKER

PEA International
Peitzmeier Co.

OUR COVER IMAGE THIS YEAR

There's no room for boredom here. Once again, the manufacturers have some exciting models lined up to ensure plenty of fun in the coming 2024 motorcycle season. And of course, we are working as fast as we can to deliver premium accessories for all these motorcycles in the Hepco & Becker quality you know and love. We have a very special place in our hearts for two of these models in particular: Honda's new and long-awaited Transalp, and Suzuki's new adventure bike, the V-Strom 800. You will find plenty of accessories for both on the following pages.

But you can get already a first idea of what awaits you from this year's catalogue cover and the page 2. Of course, sophisticated luggage solutions and a range of different components for actively and passively protecting your motorcycle and its passengers are all included. But we also offer you supplies for almost all other new motorcycles and, as has been our tradition for 45 years, also for countless models that have been cruising around the world's roads for years and decades.

What's more, we deliberately decided to play things closer to home for our cover image this year. Transalp and V-Strom wheel across the Martinshöhe through the diverse Western Palatinate, right on our doorstep. Page 2 features a stop in the wildly romantic Karlstal gorge. With its quaint sandstone rocks, it is one of the most beautiful gorges in the Palatinate Forest and is located very close to the legendary biker meeting point of Johanniskreuz, making it the perfect region for any successful motorcycle tour.

And if you're out and about in the area, feel free to pay us a visit.
There is always something to discover and we'll be delighted to have you.

Until then, we send you our warmest regards from Pirmasens.

The product contents list can be found from page 15 onwards.

HEPCO & BECKER PEA International Peitzmeier Co.

TEAMWORK

Unfortunately, it is no secret – almost everywhere we look, we are faced with bad news and little hope.

But our trade fair experience at the EICMA 2023 in Milan in November was a far different story. Well over half a million cheerful and interested individuals packed into the eight fully sold out halls of the trade fair to get inspired by the vast number of new motorcycle models and huge range of accessories on offer. Of course, we were also part of the action with our prestigious stand and took part in countless fascinating discussions over the six days.

And we brought this positive feeling back with us to our premises and everyday work. After all, it is also a powerful incentive for the team in our Development department. Day after day, they ultimately face the challenge of designing, testing and perfecting high-quality accessories in good time. We are delighted to introduce our "Makers" to you over the following pages and to grant you a peek behind the scenes here at Hepco & Becker.

Once again, you will find plenty of new items in this catalogue. But we have also revised some of our popular products and given them a new look. Get ready for a surprise and take some time to have a look through. As usual, you can find accessories for brand-new models arriving on the market in 2024 on our website at www.hepco-becker.de. If you cannot find what you are looking for there, our expert Sales team will be happy to help you further by telephone.

If you would like to meet us in person, you can find us at the motorcycle trade fairs in Friedrichshafen, Munich, Dortmund and Tulln in beautiful Austria in 2024. And of course, at the EICMA in Milan once again. We are, of course, always there for you at our premises in Pirmasens, both in Workshop Sales and Workshop Assembly.

As always – we look forward to meeting you and wish you a happy, safe 2024 packed with plenty of adventure. Thank you for your continued loyalty!

The Hepco & Becker team

ENVIRONMENTALLY FRIENDLY AND SUSTAINABLE MANAGEMENT

At Hepco & Becker, we stand by our honest promise to bring only durable, high-quality products to the market, worldwide and at all times. Early on in our company's forty-year history, it was important to us to carefully balance ecological and economic concerns and to bring them into a sensible relationship. Sustainability is more than just a buzzword for us – we embody it and see ourselves as responsible for people and nature today and in the future.

Our strategy is not only to strive for economic sustainability, but also to focus on environmental and socio-ecological sustainability. This already begins with the development and manufacture of our products. This includes short distances, the reduction of material and energy consumption as well as nature-friendly material cycles and waste avoidance. For example, we conserve valuable resources by using our own solar power, recycle production residues externally using a sophisticated recycling concept, and strive not only to comply with recognised environmental standards in production, but also to exceed them.

We also ensure the sustainability and longevity of our products through our qualified, fast and widely praised repair service. We keep our products „alive". Defective components are largely replaced or repaired by us. Nothing is more environmentally friendly and efficient than maintaining existing parts. The production process of our leather and its control are also important factors for us. First and foremost, we require species-appropriate animal husbandry and expect the leather to be tanned in full compliance with European environmental standards. We also make progress with many small steps. For example, we offset CO2 emissions caused by our paper consumption by participating in a climate protection project in Brasilia. This saving alone would be enough to circumnavigate the globe several times by motorcycle.

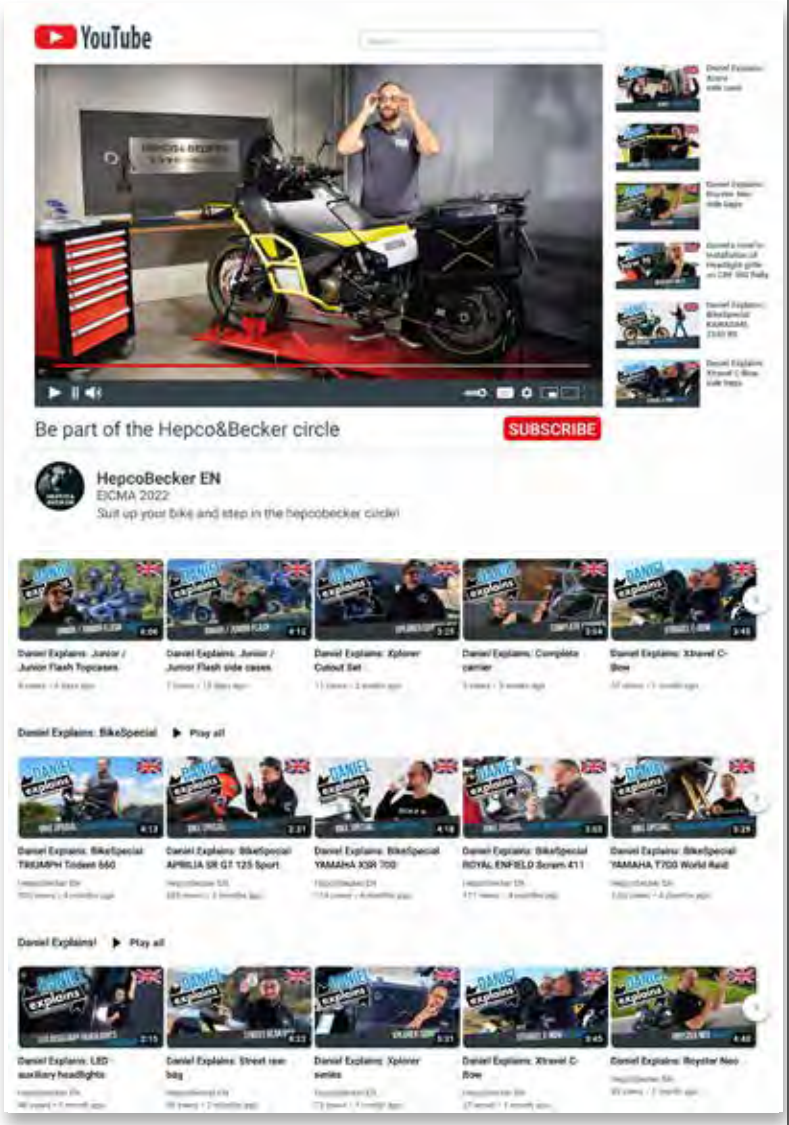

SOCIAL AND HUMAN RESPONSIBILITY

Hepco & Becker is a globally active, medium-sized company and a major manufacturer in the field of motorcycle accessories. For 45 years now, motorcycles have been upgraded and personalised with our model-specific products. We currently employ around 80 people at our site in Pirmasens. We place great importance on ensuring that the people who manufacture our products are paid fairly. Therefore, we demand from our producers and suppliers that they pay their employees appropriately too. Respect and decency dictate that people should be able to live from their work and find socially acceptable working conditions. Our employees should not only be able to perform their work safely, but also remain healthy. We stand by our special responsibility towards our employees, which does not end at the factory gate. It is also important for us to be involved in local associations and to provide financial support for children's and youth work.

#HEPCOBECKER
@HEPCOBECKER

HISTORY OF THE COMPANY

Hepco&Becker, a name that guarantees quality and stands for service for motorcycles. The one-man operation was founded in 1973 by engineer Franz Becker, who was involved in a fatal motorcycle accident in 1975. The business was continued and developed into a medium-sized company by young student Paul Ehrhardt. Its production in the early days involved essential metal parts.

1984 marked the takeover of hard-shell case production by Hepting & Co. from Stuttgart Feuerbach and the foundation of Hepco&Becker GmbH as the continuation of Franz Becker GmbH. Hepting was once one of the largest suitcase manufacturers with more than one thousand employees in Germany. In the seventies and the beginning of the eighties, Hepting manufactured thousands of motorcycle cases for BMW and Krauser.

Thanks to in-house case production, Hepco&Becker successfully provided new, attractive products and assumed a leading role on the market. Whilst a number of competitors have disappeared, Hepco&Becker has managed to remain successful to this day. The rhino became a key concept for the Hepco&Becker brand.

It represents independence and robustness, power and durability, just like every item that comes out of the Hepco&Becker establishment. The rhino has high loyalty values for many motorcyclists as it is not so easy to dissuade thanks to a certain stubbornness. Sustainability and reliability are, to this day, values which shape and define day-to-day business at Hepco&Becker.

THE COMPANY TODAY

Hepco&Becker is a globally active, medium-sized company and a major manufacturer of motorcycle accessories with a brand profile. Motorcycles have been upgraded and customised with model-specific products for over 45 years now, and we employ approx. 80 people at our site in Pirmasens. Customers from over 60 countries appreciate the quality and variety of the Hepco&Becker product range. Regardless of in which country you are travelling:

The Hepco&Becker brand is renowned for its genuine pledge to provide long-lasting and quality accessories. Hepco&Becker has grown sustainably since its founding, and combines traditional model diversity with innovative, high-quality products "Made in Germany". Components and carrier systems for over 1,000 motorbike models have been produced over the years. Small series of products can even be produced for classic and newer models. We can also manage specific requests from customers.

All our employees are motivated with a passion for bikes, based on their crucial, individual role in the company.

Our commitment is to ensure employment in the region, sustain eco-friendly production and to conduct respectful working relationships. Future-oriented investments are made in training young people who will benefit from the vast experience of our long-term employees. We implement a flat, hierarchical corporate structure and ongoing employee training to also serve the personal and professional development of each individual.

This is how we encourage an innovative spirit and the creativity to develop new products. This creative power forms the basis to expand our product range. At the same time, we strive to meet the high demands in terms of quality and products of our customers.

Hepco&Becker is your "one-stop shop". This enables optimal networking between individual departments.

A production/warehouse area, with a surface area of 1800 square metres will enable us to invest in the most modern tube processing machines and welding technology.

Our logistics and warehouse management departments also need extra capacity for the thousands of items.

IT ALL STARTS WITH IDEAS THAT ULTIMATELY BECOME REALITY

Anatoli Quint (AQ), Alessandro Basso (AB), Matthias Gellert (MG), Nils Arnold (AN), Max Tiefenthaler (MT), Michael Daniel (MD)

PASSION-DRIVEN DEVELOPMENT

It is our goal to develop and manufacture high-quality products. By doing so, we are able to enhance motorcycles and offer every customer their own way to equip or convert their bike to suit their own ideas and needs.

But these ambitious goals can only be realised with an extraordinary team effort. A combination of years of experience and technical expertise, passion, ambition and love for life on two wheels enables us to constantly create new, beautiful and successful products that are a hit with every motorcycle enthusiast. We employ design, functionality and quality to bring about safety, emotions and exceptional experiences.

The motorcyclist with their ideas and needs determines what we develop. The desires and preferences of each individual often vary greatly. Technical innovation and a strive for modernity on the one hand, and a yearning for the past and rediscovery of the little things on the other give the world of two-wheelers excitement and meaning.
We believe our strengths lie in understanding passion for motorcycling, knowing our customers and therefore understanding what they want.

Each new motorcycle offers new opportunities for improvement, change and personalisation. We use our decades of experience to examine each and every detail and analyse it for any weak points. This is a constantly ongoing process where our proximity to our customers and not least, our close-knit network, help us to come up with development ideas and implement them in the shortest time.

A small, elite team works with a great deal of passion and commitment in our Development department on how to put these ideas into practice.
At this point, it's time to let these people, who pursue our guiding principle day in day out, speak for themselves. We carried out a brief group interview in our Development office, where you may find out some interesting trade secrets.

Confirmed quality!

Through recurring audits, TÜV Rheinland has confirmed for years that the internal standards for our products and processes meet the high quality standards of independent institutes. Our verified management system, which includes the development, production and sale of motorcycle accessories is aimed at offering products of the highest quality at all times.
Any products that are also subject to approval are given a General Operating Permit (ABE). This applies to any centre stand that leaves our company.

The required documents come with the centre stand, can be viewed on our website and can be downloaded according to type at any time.

You can rely on us, trust in our quality.

Choosing the Hepco & Becker brand always means relying on the highest quality. Quality that you can rely on for years to come and that we promise you beyond the statutory periods!
Hepco & Becker therefore voluntarily offers its customers a 5-year manufacturer's warranty.
Hepco & Becker assumes this manufacturer's warranty towards consumers for products in addition to the statutory warranty that the consumer is entitled to towards the seller.

This applies regardless of any mandatory statutory liability regulations, such as the Product Liability Act, in cases of intent and gross negligence by Hepco & Becker or its vicarious agents resulting in injury to life, body or health.

QUESTIONS TO TEAM MEMBERS

1. First things first: What do you generally consider important when developing new products?

NA: The answer varies greatly, and of course, depends on the product in question. Given that all of us are motorcyclists ourselves and spend a lot of time on the road, we're able to contribute our own experience to the process. Our main focus always lies with consumer benefits and functionality, as well as the question of whether we would screw the product onto our own motorcycle. We don't develop any products we don't believe in ourselves!
The high and constantly growing quality demands of our customers and our competition also motivate us to develop creative ideas for new products and to stay innovative.

2. Who decides and, based on which criteria, which product you develop for which motorcycle?

NA: We generally try to make decisions as a team, as each of us has our own different strengths and a lot of experience to share. Another important indicator for us is the motorcycle market or the vehicle manufacturers, who are always introducing new, highly interesting models to the market, for which we can, of course, offer luggage solutions and protective gear.

We have a clear motto in this regard: "Yesterday's customer is and remains tomorrow's customer!" That's why we partly also develop products for niche vehicles and exotic models or focus on special requests from individual customers. Through our crafting manufactory, we are always able to produce small to very small series economically, and in turn, offer these to our customers.
Thanks to growing globalisation, we also have many national importers around the world that we have been cooperating with for many years. We always maintain close partnerships and regularly exchange information.
This entire development process takes no more than two days, which we consider a unique pace. This doesn't include our functional and practical testing, which always takes place afterwards.

3. A new motorcycle model comes in, and you want to develop a crash bar for it. How long will it be until the customer can buy it online or in store?

NA: It takes four to six weeks to transform an idea into the finished product.

During this time, we usually achieve development and are able to supply the customer with series parts. As soon as the motorcycle is standing on the lifting platform in our development workshop, we can get started! We are a well-coordinated team of mechanics and design engineers that work hand in hand. Together, we discuss the design and implementation, before our specialists begin opening up the screw points on the motorcycle, identifying mounting material such as screws and sleeves, and setting up the production machines. In the meantime, the initial angular steel bracket designs are created in the CAD system, which are produced and screwed to our machines as prototypes.
Steel tube bending is a supreme discipline! It takes lots of experience because we programme the machines for these freely from our head based on the design idea. This is followed by documentation and the careful creation of our installation instructions. Finally, we specify the data determined from these prototypes and produce the welding and testing gauges required for series production.

4. It sounds like that was just the quick version! If we were to get more specific: Once the new motorcycle is on the lifting platform, what happens first?

MG: First, the motorcycle is lashed cleanly onto the lifting platform. Safety first!
AB: We don't do anything without detaching and taking off the sensitive trim parts! Development takes place directly on the motorcycle, where we take special care to avoid any damage.
MG: Then there is a team meeting directly by the motorcycle. Even before this, all those involved have already thought about what might be "missing" from the motorcycle. But it's only in reality, directly next to the bike, that they can check the implementation and have to take different approaches. Each person is able to contribute here. At any rate, we always try to implement our "standard programme" – protection, luggage, accessories.
MT: Yes, that's the goal! But we have to and want to have the motorcycle physically in the Development department to be able to decide what makes sense. For example, with guards, it also very important to look at the structure of the motorcycle frame. It's only possible to see which mounting points are suitable for absorbing the arising forces as best as possible in the event of a crash once you've removed one or the other screw. Identifying these fixed points on the motorcycle is also decisive for the design.
AB: Out of all the requirements for development, it's worth remembering that

SERVICE is one of our top priorities!

Good, all-round service is just as important today as the quality of the product itself. Our customer service starts with good advice and will accompany you and your product at best for a lifetime.
Whether by telephone, email or via our social media channels, we are here to listen to you and your concerns. You can contact us at any time and will receive a competent answer as quickly as possible.
As a matter of conviction, we refuse to use chatbots or other AI-based software tools. We greatly value personal, direct interaction. You can therefore be sure that you will always get a response from trained employees with the right specialist knowledge for your issue. This starts, for example, with universal product advice and goes as far as the apparently simple request for a spare part.
Experience has to be experienced.

Each kilometre driven with Hepco & Becker accessories is also another test kilometre for our products. Whether offroad or on long, speedy motorway transfers in the constant rain. Each tour comes with new findings and experience. We are therefore always grateful for feedback and suggestions for products or constructive suggestions on how we can improve our products. We'll take the message seriously, engage with it and consider what is feasible and/or makes sense to gradually make our products even better.

Quality on location. Hands down!

Where possible, we manufacture on location here in Pirmasens to be able to perform the necessary controls and quality assurance. Our long-term success proves us right and is probably also due to the fact that we work with capable, reliable partners and suppliers.
These existing, evolved partnerships will remain the cornerstone of our quality claims at Hepco & Becker in future. Where possible and after considering everything, we manufacture our products with conviction in Germany. The supply performance and deeply rooted quality awareness in this country confirm this attitude with each new day.

As a result, we continually invest in development and quality assurance here in Pirmasens. We consider the interlinking of both departments essential when it comes to new developments and product improvements and make sure to protect this level of quality in future.

QUESTIONS TO TEAM MEMBERS

the motorcycle is often only directly on the lifting platform for 2-3 days during the first stage. The first step is therefore to set priorities and meaningfully distribute tasks within the team. Efficiency plays a major role here.

5. From where do you get your inspiration and feel for the right design of the tube parts?

AB: There are many influencing factors here. Personal sense of taste, the existing framework conditions, such as frame/tube/trim connections and experience from countless developments and customer feedback are important here.
MT: Some of us are motorcyclists ourselves and therefore have a certain sense of taste. When you work in the Development department, you simply need to come with the right feel for design. Years of experience are also a tremendous help.

6. Who is responsible, e.g. for how an engine guard finally looks?

AB: It's a combination of the designed idea, technical implementation and function of the guard.
MG: Michael plays a huge role in the tube constructions, especially with guards. He's been around forever and knows what is feasible technically and for series production.
MD: The senior boss still gets involved. (Grins unanimously and winks)

7. How do you know whether an engine guard is the right size and is able to withstand real-life conditions?

MG: This is an interplay of experience, theoretical load analysis and practical tests. These take place during the quick meeting or on multiple photo and test tours. Long-term tests are mainly carried out by friendly motorbike travellers.
AB: The endurance tests on the test bench are important, especially for our cases and bags. This is not only the case for new developments, but also series parts.

8. What base material is used for the tubes?

MD: We use the following dimensions of steel, depending on the purpose: 32/25/22/18/16 x 2 mm
NA: We require a consistently high level of quality to ensure the required manufacturing precision. In addition, we need high tensile strength in the tubes for our products. This is a key quality characte-

ristic, particularly for guards. We therefore only buy German quality steel from renowned manufacturers.
MT: Particularly in the area of stainless steel tubes or chrome products, we place high demands on the quality of the raw material, as this is where the high-quality surface processing (glass bead blasting/ electropolishing with stainless steel or the chrome-plating process) reveals errors in the output material most.

9. Are standardised tests carried out, and if yes, in which areas?

AB: We regularly perform vibration testing in the luggage division. To check the bags or even the rack constructions. The TÜV regularly visits for centre stands. A predefined test process exists here for every new development.
MG: There are checklists to follow for all attachments. For example, we always check the ground clearance of the motorcycle when our accessory parts are installed.
AB: Consideration has to be taken of the ergonomic aspects of the average biker. Tests to assess leg room or even unrestricted operation of the brake and clutch pedal are therefore mandatory and must be ensured.

10. How do prototypes become series parts?

AB: First and foremost, the finished prototype is captured digitally in its entirety. During the gauge construction that follows, minor optimisations are still performed as necessary. To then manufacture a 0 series (a low quantity of 10 parts is manufactured under real-life manufacturing conditions). Series production can only start once these parts have been released. In parallel, the installation instructions are created and required components such as screws, washers and distances are checked for availability and ordered directly with long lead times.

11. And when do you come in, Anatoli?

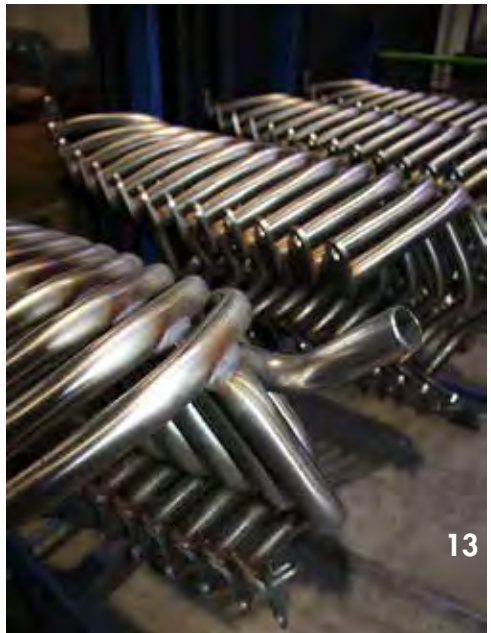

AQ: My job is to make the required manufacturing gauges for an available sample. Nothing more and nothing less!
NA: I can describe his job a bit more precisely here (laughs). His role acts as the link in the chain between development and production. Anatoli makes sure that the gauges for production are manufactured properly and accompanies the first series production. What makes his experience so valuable is that he knows exactly what is needed in production and where potential challenges may lie.

Appreciation creates value.

It takes a lot of motivated people all pulling together to be able to offer you the best possible product. The positive attitude of each individual employee is made up of passion for everyday work paired with enthusiasm for motorcycles, stemming from a meaningful and important role in the company.
This increases mutual appreciation among employees for the work they do every day. Because depending on the department and tasks in the company, each employee has their own individual abilities and expertise which comes from prior knowledge or is picked up on the job, day after day, year after year. This experience is reflected in the final product.
Over the years, this has resulted in a tight-knit team.

This policy of team spirit is beneficial for a positive working climate and good vibes in the office or workshop. Respectful cooperation and open, eye-level communication lay the foundation for manufacturing products that consumers want.
We are always on the lookout for capable hands and clever minds to join our team.

PASSION-DRIVEN DEVELOPMENT – QUESTIONS TO DIFFERENT MEMBERS OF THE TEAM

12. In the age of digitalisation, all data for a new prototype is definitely saved to the server, right?

MG: Thanks to our new ERP system, which we took live at the start of the year, lots of relevant data in the development process is entered and stored directly – but not everything! The basis for manufacturing our metal parts has always been the sample part and associated gauge, without which nothing would get done. Only in this way can we perform series production.
MT: We digitalise all relevant data required for later series production! Whether bending data, tube lengths, the shape of the laser-cut parts, etc.
AB: But we always keep the very important things in our heads. Also to protect against hackers (grins).

13. What is the finishing step in the development of this kind of engine guard?

AB: The trial attachment of the 0 series.

14. Who creates the product images that can be found in the online shop and in the installation instructions?

MG: That's where our Marketing department comes in. But if urgent, sometimes the "Junior Boss" takes care of that personally. He's well-known internally for his good photography skills and always gives it his all (winks).
PE: Fun aside! The girls from Marketing know by now what matters. The pictures have to look good and be informative. In addition, things have to work swiftly so that we can start with the publications as quickly as possible.

15. What's the secret behind products in the production department still being produced with perfect precision, even when already over 40 years old?

AQ: It's all about carefully handling and regularly maintaining the gauges. Before each series production, the gauges and samples are checked to prevent anything from going wrong in production.
AB: It also comes down to the solid construction of the gauges, which are almost indestructible.

16.And finally, one more personal question: which motorcycle on your lifting platform recently were you drawn to most and why?

AB: The Honda DAX, it could stand right next to my desk. Small, simple and fast as lightning – and we do have some beautiful accessories in our range (laughs and smiles).
MG: The KTM 890 SMT, now that's a bike I'd like to have for a week or two.
MT: The Yamaha Ténéré 700. I'm a big fan of the machine's sleek, sporty Dakar Rally design.
AQ: A Harley! Perhaps a Forty Eight Sportster – it has a really cool sound and doesn't stand too high. It's also ideal for people who aren't 2 metres tall or want some lowering.
MD: A BMW S1000R, from the latest generation – nobody needs more performance and less windscreen than that.
NA: If we're talking about something new, then the Triumph Thruxton 1200 FE (Final Edition) in British Racing Green with a metallic effect and those gorgeous, golden highlight lines. A feast for the eyes and almost too beautiful to ride.

XCEED

Exceeding limits

The XCEED sets new standards in the field of aluminium cases. The unmistakable appearance paired with the experience of more than 40 years of manufacturing motorcycle cases are the basis of this new unique case. A unique hydroforming manufacturing process leads to excellent surfaces. The titan case is additionally provided with an anodized coating, which not only increases the corrosion protection and scratch resistance but also creates a beautiful and haptic surface.

The black version of the Xceed is powder-coated. The combination of high-quality aluminium and impact-resistant plastic creates an elegant, timeless case that is light and handy.

With great attention to detail, the design takes up contemporary forms and lines. This distinguishes it from other aluminium cases. No matter on which motorbike - this case is worth seeing.

Robust bottom tray
Matt and glossy surfaces

Lock with integrated hinge
Comfortable carrying handle on both sides

XPLORER

The top class combining aluminium and plastic

A modern yet contemporary design of an extremely robust combination of anodized aluminum plate and highly impact-resistant plastic molding. This merging of design and functionality matches the modern spirit of many motorcycles.
With its 1.5 mm thick anodized aluminum plate and tough plastic parts, this case absorbs impact and vibration with special ease. The anodized or powder-coated aluminum effectively prevents unsightly aluminum wear. The Xplorer has a high-quality surface structure. The lid opens to a 90° angle!
This case is guaranteed watertight.

XPLORER

High-quality connection between sheet metal and frame
thanks to adhesive-rivet connection

Case and top case have several integrated slots for belt fastening
e. g. for a matching top bag, which is attached to the case lid.
High quality logo embossing

Waterproof thanks to integrated lid seal
and raised case frame

Xplorer top case and sicecase 40 have room for
one helmet and more...

Easy to use, stable metal locks
Fixing and lid lock)

Ergonomic handles on both sides coupled
with integrated hinges

XPLORER CUTOUT SET

Set of cases and side carrier - high volume - less width - more value

Xplorer Cutout

This exclusive set for assorted models consists of a model specific stainless steel side carrier and two Xplorer aluminum cases. Due to its recessed 37 liter Xplorer case on one side the case is close to the bike.
On the other side is a special 40 liter Xplorer case. With this combination the width is reduced and the bike looks symmetrical from the back. It does not interfere with the stability of the bike due to the center of gravity being so close. The cases are made of shock resistant plastic molding and anodized aluminum sheets. The black version is powder coated additionally.
The side carrier is made of 2mm strong stainless steel pipe with 16mm in diameter. The surface is electro polished. The system is light and stable, perfectly for offroad use.

Xplorer Cutout Set

Tool Box

The robust, completely waterproof toolbox, made from shock-resistant plastic, excellently complements the side case carrying system, and is ideally connected between the side case and the back of the bike. By fixing it on the opposite side to the muffler, the empty space is used in the best possible way and it creates additional storage room. With a length of 29cm and a width of 8cm, both tools and replacement parts can be accommodated whilst saving space. The toolbox has a quick-open screw top. The universal version can be attached in other positions too.

XPLORER ACCESSORIES

Inner bag

Easier loading before and at the end of the ride, there's no need to remove the whole case – just the inner bag. Made of hard-wearing black fabric with 2-way zipper and adjustable carrying strap.

Mounting on side cases only possible with the additional kit for Xceed.
Holes must be drilled in the case/top case. Sealing washers included.

ALU STANDARD

For everyday use and extreme situations

With the Alu Standard collection, we have created models that also stand up to extreme conditions with no trouble at all. The 1.5 mm thick, smooth, highly durable aluminum alloy helped give the collection its name.

With their right-angled shape, Alu Standard side cases provide spacious, practical storage space with no protruding corners or edges and are easy to load from above. The foam lid seal keeps the content of the case or top case dry. The different widths side cases can be combined for Enduro bikes.

Especially recommended for side carriers that have different mounting widths due to the high exhaust system position typical of Enduros. The Enduro set can eliminate this asymmetry.

ALU STANDARD

Embossing for edge protection and to increase stability and give the cases an unmistakable character

Case frame very robust and resistant due to manufacturing process

Watertight lid seal
Metal reinforcement below chrome rail

Steel support frame, chrome-plated with metal lock

Standard chrome rail
Stable metal lid lock

GOBI

The answer to every question

If you want to go on new trails, you have to leave the old paths. After 25 years of motorcycle case development and production, the GOBI is the answer to every question. The goal was to create a real alternative to the ordinary aluminum case. And with the GOBI series, we've succeeded! If an aluminum case drops, it usually gets damaged. That reduces its functionality. The GOBI is made of highly impact-resistant plastic, colored through and through. Its special shell is extremely resistant and watertight, and it absorbs shocks and unintentional contact with the ground. GOBI gets its stiffness and stability from its double-wall construction. This also allows over 3.5 quarts of liquid to be stowed in each side compartment.

Side case and top case made of robust and impact-resistant plastic, double-walled. Railing as standard on Topcase.

Watertight thanks to a special seal

Stable metal mounting lock, incl. key and cylinder

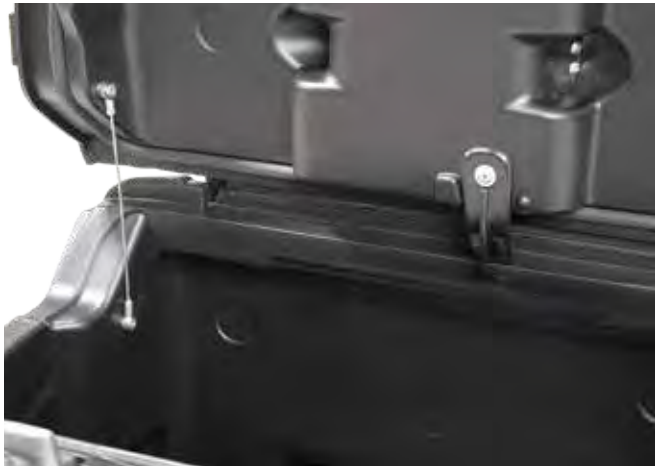

Sturdy metal lid locks including key and cylinder
Stability and design due to ribbed structure

Integrated ergonomic carrying handle and rubber hinge cover

Lid locking device and lid holder, standard

JOURNEY

Aerodynamic design perfected

A timeless classic: Modern design combined with consistent quality and ingenious details. No matter which angle you lock atyour motorcycle from, the JOURNEY series' aerodynamic makes for a sweeping appearance and a safe ride. Plus, the JOURNEY series provides enough storage space for long trips and stays watertight thanks to special seals.
The unique integrated bumper strip protects the case during minor jostling and impacts. The case's shell is made of impact-resistant, double-walled plastic. The removable covers can optionally be painted to match the bike color.
This product has been proven over years.

JUNIOR / JUNIOR FLASH

Classic design by Hepco&Becker

For many years, the undisputed sales champ – always comes in first in comparison tests. Our „Junior“ case series.
It doesn‘t matter which version or size you pick: Junior cases are designed and tailored for strength and practicality in mind.
We offer Junior side cases with 30 or 40 liters of space. Robust and highly resilient through its double-wall construction, it forgives rough landings, protects its contents even during small jolts and is watertight. The case‘s side lid makes it optimal for loading. Two strong tension belts hold the content in place even when the lid is open.
The Junior 40 has space for a helmet.

JUNIOR / JUNIOR FLASH

High quality exclusive surface appearance
Covers are smooth and varnished; example shown here is silver

Available in 2 sizes, so well suited as enduro set

Side cases Junior / Junior Flash 40 space for one helmet, 2 tension belts in each case shell

Surface detail Junior Flash. Above is the Junior Flash with silver cover. Cover can be removed and painted to match your bike.

Dynamic look on the bike due to asymmetrical design with separate cases for the left and the right side

High quality grained plastic surface

JUNIOR / JUNIOR FLASH ENDURO SET

The Junior series is available as an Enduro set with 2 different case sizes.
For those who like an especially slim bike width and have different luggage carrier widths due to the high exhaust system position typical of Enduros.
The Enduro set can remedy this asymmetry. Depending on which side the muffler is on, we provide the right combination of 30 or 40 liters case.

Side case set Enduro
Junior 30 left / Junior 40 right
Weight: 3,5/3,8 kg
Capacity: 27 Litres / 37 Litres

JOURNEY / JUNIOR TOP CASE SERIES

The practical storage space for your motorbike

Within our Topcase series you can choose from a wide range of sizes from 29 to 55 litres capacity and different versions with and without covers. Whether for the scooter or as additional storage space on the tourer - we have the right topcase for every need. Combined with a Hepco&Becker rear rack tube type or an Alurack/Easyrack top case carrier, the top cases are securely fastened and cut a fine figure on your motorcycle even without a side case. If your bike is already equipped with an external supplier rack, we also offer top case versions with a universal adapter plate (top case pallet). For all Journey topcases there is room for at least one helmet and more. The shells are made of high-quality, impact-resistant plastic. 100% waterproof due to circumferential rubber seal and overlapping of the shells. Useful accessories such as backrests, railing and inner bags available.

Always enough storage space for at least one helmet and more...

Wide range of accessories:
Inner bags, railings and back rests

Suitable for every taste and need
Different colours, panels and sizes available

HEPCO & BECKER PEA International Peitzmeier Co.

XCORE

Stylish travel companion for any weather

Whether you're going on holiday in bright sunshine or on an excursion in light drizzle, your luggage stays dry and safe in the Xcore side case. It's a pleasure to be well-equipped when travelling along country roads or exploring new regions.

The high-quality workmanship is already evident from the outside. Made of two black, highly impact-resistant plastic shells that provide the necessary robustness. The front is adorned with an anodised aluminium plate with Xcore embossing – a design that matches many machines.

Openable on both sides, it's ideal for keeping provisions, rain gear and much more besides close at hand when you're on the move. Packing is also easy, as the lid is completely removable and lockable.

As usual, you can rely on our theft-proof design: the case can be locked to the C-Bow holder from Hepco&Becker. So your luggage can stay on your bike during your break. When you arrive at your destination, extend the robust carrying handle with logo lettering and check in to your accommodation in style.

Robust thanks to two highly impact-resistant plastic shells
Aluminium panels are easy to replace

Convenient retractable handle allows for easy handling

Lock with integrated hinge, handy push operation
Key and lock cylinder included

Waterproof due to integrated lid seal and raised case frame

Theft-proof attachment to the C-Bow

Special look due to combination of aluminium and plastic with different surfaces

ORBIT SIDE CASE

Be different

Following the „Be different" motto, we have created an innovative product for the motorcycle industry with the new Orbit side case.
A striking accomplishment at first glance, furthered with closer inspection, one can notice its distinct design cues. The Orbit side case is the perfect choice whether you have to run an errand or take a weekend trip. The case differenciates itself from other side cases due to the modern look. The All-In-One design concept combines a lid and retainer lock which makes handling very easy and allows to the contents to be locked safely.
The Orbit SC must be combined with the C-Bow carrier for your specific bike. Without the cases, the C-Bow Holder remains unobtrusive on the bike maintaining the look. Obligatory at Hepco & Becker: 100% waterproof!

Through integrated seals in signal colours.

All-in-one lock design - Combines a cover and stop latch for simple use.

STRAYKER

The elegant classic with a high-quality appearance

A classic of the highest quality!
These elegant retro bags hark back to the leather suitcases of generations past. The Strayker case is not made of leather, but of high-resistance, watertight soft-feel material with a leather look that holds its shape excellently.
With its color-contrasting corner applications made of enameled plastic, it is a true highlight for any roadster and a real alternative to hard-shell cases. Off the bike, it also looks great as an everyday briefcase. It has plenty of space for A4 folders or a laptop.

XTRAVEL

Explore & Travel - Xtravel

Explore & Travel - This motto gave its name to this new line of bags. A collection created to discover the new in the distance. No matter with which motorcycle, no matter where the journey goes - the range of applications of Xtravel is almost limitless. Multifunctional and universally applicable, almost no wishes remain unfulfilled.

We have succeeded in creating a collection that is waterproof as well as robust, solid, suitable for off-road use and simply stylish. In addition, the functionality of the attachment to the motorcycle is essential: Whether on the C-Bow holder, the side case carrier or the rear section of the motorcycle - every bag has its purpose.

You can drive with the Xtravel Basic around the world or with the Xtravel C-Bow version to the cafe, whether in unpaved terrain or on asphalt - Xtravel will also convince you.

ROYSTER SPEED

Uncompromisingly sporty

Royster Speed – uncompromisingly sporty Form follows performance.
The Royster Speed is streamlined, compact, no-frills and has been reduced to the essential features that a bag with this requirement profile must have.

It is made of robust and resistant EVA material, which also gives the Royster bag its dimensional stability.
Water-repellent on the outside, the contents are protected by an additional, waterproof inner pocket with a roll top closure.

Safety in the dark is enhanced by the reflector triangles.
Tried-and-tested convenience features, such as the theft-proof C-Bow locking mechanism or robust zips that can be additionally secured with the addition of a lock, are obligatory.

The Royster Speed is ready to match the sporty design and performance of current motorcycles.

ROYSTER NEO

Design taken to the next level

As a visual highlight among the side panniers, it impresses with its independent, striking and fresh design. It is made of robust and resistant EVA material, which gives the Royster Neo bag its dimensional stability. The front is covered with abrasion-resistant polyester 1200D. The back panel is coated with polyurethane in „Diamond Shape Optics“. This increases the dirt resistance and makes cleaning easier.

Its light weight makes the bag very handy and allows it to be carried easily thanks to a functional handle. Water-repellent on the outside, the contents are protected by an additional, waterproof and removable inner pocket. The volume can be increased by 1.5 litres thanks to the all-round zip.

The inside of the bag is locked with a sophisticated combination lock. The C-Bow holder ensures theft-proof mounting on the motorbike.

STREET

The bag with anderstatement

The redesigned STREET softbags for our HEPCO&BECKER C-Bow side carriers not only look good, but they are sturdy and the contents are easily accessible. We gave the bag a minor facelift in 2020, but rest assured: different design, same quality!

Not too bulky, but the compartment capacity is definitely roomy enough for a weekend trip. The bags can withstand a brief shower, while the waterproof inner pockets will keep the contents dry during longer downpours.

Our system with the C-Bow carrier has a decisive advantage over the conventional fastening with straps under the seat: the theft-proof and secure attachment with a locking mechanism on the C-Bow carrier. No slipping, no hanging down; they retain their great shape.

Made from robust and tear-resistant polyester fabric. The back panel is reinforced with PU, resistant to dirt and water-repellent.

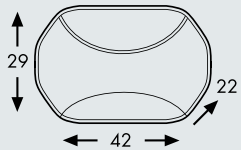

The contents are protected with an additional, waterproof inner lining.

XTRAVEL TAIL BAG XL

Explore & Travel - Xtravel

With a generous packing volume of 50 litres, the new soft bag is perfect for longer trips. Thanks to the integrated compression straps, it can be securely fastened to the motorbike even with less luggage. A spacious, waterproof inner pocket made of polyester with the tried-and-tested roll-top closure keeps things dry when riding in the rain. The water-repellent outer material with inner coating and the covered zips mean that even short rides through light rain are easily managed.
There is a zipped mesh pocket in the lid of the bag for storing items requiring quick access. Two additional external pockets are quickly accessible through zips and offer additional packing volume. The zips to the main compartment are lockable. It is securely fastened with a reliable 4-point tensioning strap. The anti-slip material on the underside of the bag provides even more grip and the integrated seat pan pocket improves this even further. The reflective details ensure better visibility in road traffic.

ROYSTER REARBAG

Right behind you!

Now the Royster product family is complete! The unmistakable look of the Royster product line is complete with the addition of this rearbag .
The modern rear bag is a visual highlight for any pillion seat. Alongside the focus on packing volume and function, this bag claims to be contemporary yet entirely innovative.
The Royster rear bag offers two fixing methods: The bag can be mounted in a flash onto a model specific sport rack using the Lock-it/Basic fixing, or conventionally on a pillion seat using the reliable 4-point strap fixing.Thanks to both models, the rear bag is the perfect luggage solution for lots of sporty motorbikes.
Whether it's for a short trip or long journey, the Royster rear bag offers a generous amount of space to complement the Royster side bag and tank bag.

STREET REARBAG

Make two out of one! With facelift and additional version

The Street rear bag comes with a facelift in 2022 and in two versions:

Strap version:
The scope of delivery now includes 4 loop straps for individual attachment, for example on the pillion seat.

Lock-it version:
In addition to the 4 loop straps, the Lock-it tail bag holder is also included. This holder allows it to be mounted on a mini or sports rack. The mounting of the counterholder on the underside of the tail bag is the same as for the tank ring counterholder.

- The belt version is suitable for almost all motorcycles.
- Reliable tension belt fastening
- Lock-it version suitable for Minirack or Sportrack
- Volume expansion through all-round zip
- Underside made of non-slip material
- Zipped mesh compartment on the lid
- Water repellent outer material
- 2 outer compartments with zips
- Robust carrying handle
- Integrated rain cover
- Reflective details for increased visibility

LEGACY

From the past grows new...

The Legacy collection is characterized by timeless chic and the use of uncompromisingly high-quality materials. Functional, robust, and smart with a quality found nowhere else.

Made of wear resistant material, sewn in layers, and coated with a permanent water-repellent solution. In addition, the inner lining is made of waterproof polyester.

For the Legacy collection we use naturally refined leather materials: 3.3mm thick, naturally tanned cowhide. The leather is finished and treated by hand in our factory. This allows for a unique look.The quality of workmanship, craftsmanship, and choice of materials are the hallmarks of the Legacy line.

EPIC / ROYSTER / STREET TANKBAG

Tank bags, small to XL

Whether you are commuting to work or taking off on a weekend adventure or long-distance journey, our tank bags are the perfect solution for transporting your most important items. With their versatile design and practical size, our bags offer plenty of space for items such as your phone, keys, wallet and even a change of clothes.

Tank bags are not only practical, but also a stylish addition to your motorcycle. They offer numerous features that have proven to be extremely useful in daily life. Two-way zips, a carry handle and an integrated rain cover are usually included as part of the basic equipment.

Thanks to the innovative Lock-it or Basic tank rings, you can quickly attach or remove the tank bags.

Not able to or don't want to have a tank ring? No problem: our Epic 11 Belt model is conventionally attached to the tank using straps.

EPIC 16

For epic moments on your bike

- High-density EVA foams, along with tear-resistant and durable 840D Ballistic Polyester ensure it retains its shape.

- Back with anti-slip coating made of polyurethane and additional increased resistance to dirt
- Cover made of abrasion-proof polyester D1200
- Waterproof bag, interior organiser compartments
- Contents easily accessible thanks to wide opening

LEATHER BAGS

Attractive leather collection for highest demands

Our leather collection doesn't just stand out for its peerless quality. Our items are made only with topgrain leather. We never use cheaper, poorer-quality split leather! Even the leather's development process and its monitoring are important to us. Above all, we see to humane treatment of livestock and observance of European environmental standards during tanning. All of our saddlebags are produced especially for us in our traditional leather craft shop. It provides the highest- quality leather and workmanship. This can be seen right away: The bags hold their shape extremely well thanks to hidden shape reinforcements and a plastic double rear wall – no drooping, no flapping. Rugged clasps and corrosion-protected accessories are a given. Sensible accessories, such as inner bags and rain hoods are available separately. The leather bags are available with two different mounting versions:

for C-Bow holder

for leather bag holder

Special mounting instructions see page 140

LEGACY

Leather briefcase college-Style

Customizer: palatina dreambikes

Anyone who likes retro will love our new briefcase! It impresses with its hip college style. The inside offers space for all the important things: Both a 13 inch notebook and A4 documents can be stored in the large main compartment. Available in 2 versions: As a leisure bag without fixing option on the bike and for fixing to the C-Bow bag holder.
All of our leather bags are produced by us in our traditional leather craft shop with leather from European livestock, tanned according to the strictest environmental standards.

Quick-release fastener with mortise locks. High-quality, corrosion-resistant metal and naturally tanned leather are used here

RUGGED

Unconventional leather bag

This bag is outside the mainstream and we like it that way! With its unconventional design, it commands to push design even further with a modern „used" look. The RUGGED combines luggage capacity with an unmistakable appearance that looks best attached to your motorcycle. A surface treatment closes the cowhide's pores, reducing water sensitivity and increasing soil resistance. A convenient carrying handle lets you take the bag anywhere.
All of our leather bags are produced by us in our traditional leather craft shop with leather from European livestock, tanned according to the strictest environmental standards.

NEVADA

A bag that that boasts a different design; Nevada focuses on what is important. No rivets, no shells, and no off-beat design elements! The Nevada has a refreshingly restrained design – without giving up what is necessary in a full-fledged leather bag.
The bags hold their form extremely well and have hidden reinforcements and a plastic double wall. This means no drooping, no fluttering and a solid hold to the carrier system.
All of our leather bags are produced by us in our traditional leather craft shop with leather from European livestock, tanned according to the strictest environmental standards.

RUGGED CHEST LEATHER CASE

Rugged Chest leather case – your rugged companion with character

Genuine, honest, and unique – this leather case is like a good friend. The treasure chest made of 3.5 mm thick cowhide leather for choppers and cruisers can definitely do more than just a regular luggage bag. It is a piece of individuality for your bike – and also equipped with many useful functions. It offers enough space for your helmet and can be locked with an integrated lock. The overlapping lid protects the inside from splashing water. As befits an authentic case, it has no zips, but rustic flaps, seams and loops. Angular, square or striking? Retro or new? It is not advisable to pigeon-hole the Rugged Chest leather suitcase. It is the way it is – and that is exactly what makes it perfect.

The tail bag is available in two mounting versions:

1.For individual mounting:
Includes quick lock for mounting to almost any rear rack .The quick locks are fastened by the customer. The fastener set and instructions are included.

ACCESSORIES FOR LEATHER BAGS

Legacy belt

Legacy belt black
Item-no. 4201975 00 01

Legacy belt brown
Item-no. 4201975 00 08

A high-quality leather belt with Hepco&Becker belt buckle and classy embossed logo. We only use premium accessories and naturally tanned leather.

Inner bags

for Buffalo / Buffalo Custom / Ivory
Item-no. 700408

for Buffalo Big / Buffalo Big Custom
Item-no. 700431

for Liberty / Liberty Big
Item-no. 700405

for Rugged
Item-no. 700433

for Rugged Chest
Item-no. 700510

With this inner bag, nothing scatters around the saddle bag and everything stays in place.The saddle bag is easier to load, because the inner bag can be packed ahead of time. The bag is made of heavy duty black fabric. Equipped with a base plate, a 2-way zipper and an adjustable carrying strap, everything stays neat, even during unpacking.

Shoulder strap Leather fluid

Legacy shoulder strap
Item-no. 7401975 00 01

Very practical, turns the leather briefcase into a shoulder bag. With legacy logo embossing.

Legacy leather fluid
Item-no. 7101975 00 01

The leather cleaning fluid increases longevity and weather resistance of the Legacy collection.

Rain hoods

Our leather bags are water-repellent in daily use. However, 100% water-proofing is not guaranteed. This is where the rain hood helps and protects the leather bag and the capacity.

NOTICE FOR LEATHER BAGS

Leather bags are available in different versions and equipment. To help you choose, we present the possibilities here.

HOME INSTALLATION

Leather bag for leather bag holder – optional with holding clamps

Designed for home installation with a fastening set for attachment to the bag holder (leather bags cannot be removed). This requires holes to be drilled in the back wall of the leather bag.
NOTE: The leather bag matches only the bag holder it is attached to.
Once the holding clamps are installed, a leather bag can no longer be changed.

Holding clamps, for self-assembly
Item-no. 700429

Leather bag for leather bag holder – optional with quick lock

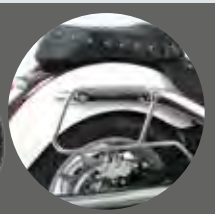

Another option when using a bag holder is our quick lock at additional charge for home assembly. This allows the leather bag to be removed from the bag holder at any time.
Moreover, the lock works from inside the bag, securing the bag from theft. Home installation is very complex.
NOTE: The leather bag matches only the bag holder it is attached to. Once the quick locks are installed, a leather bag can no longer be changed.

Quick lock, for self-assembly
Item-no. 700403

FACTORY INSTALLATION

Leather bag for leather bag holder-optional with quick lock installed at the factory

Another option when using a bag holder is our factory-installed quick lock. It allows the leather bag to be removed from the bag holder at any time. The lock also locks inside the bag to deter theft. The leather bag and bag holder are ordered together and installed in pairs.
NOTE: The leather bag matches only the bag holder it is attached to. Once the quick locks are installed, a leather bag can no longer be changed.

Quick lock, factory fitted
Item-no. 700402

C-Bow leather bags for C-Bow holder

We recommend the leather bag's C-Bow version (if a C-Bow leather bag holder is offered for your motorcycle). This requires no home installation and switching the model to a different motorcycle with C-Bow is no problem.

CARRIER SYSTEMS

For more than 1000 motorcycle models

After choosing the case or bag, it's then a question of how to fasten them to the motorcycle. There are a variety of different attachment systems for this. On the following pages we present you with the luggage attachment possibilities. You can find out whether we also supply this for your motorcycle in the price list or keep up to date on the website.
We therefore provide different carriers not only for current models but also for youngtimers and motorcycles that are more than 30 years old. This has now exceeded 1000 models.
Hepco&Becker has premium side case carriers and side carriers in their range, exclusively for true classics. They manufacture products which not only impress when used but are also aesthetic and timeless.
For all of our carrier systems: these include the complete attachment kit with the necessary fittings and simple instructions.

For all products:
- Specially developed for the respective motorcycle model; universal parts available for particular solutions
- Cases and bags specially developed for HEPCO&BECKER
- Cases and bags from a single source
- No additional costs for additional adapters
- Metal tube made of forged German steel with high quality plastic coating, chrome plating or in stainless steel
- Comprehensive, simple instructions

PROTECTION/ACCESSORIES

High quality components for your motorcycle

Globetrotters and touring riders have sworn by the products from Hepco&Becker for decades. In comparative tests carried out by trade press, we are regularly ranked the forerunners when assessing fitting accuracy, weather resistance and functionality during use; in short, it is an assessment of quality.
In addition to our extensive range for luggage transportation, we offer an abundance of other components which serve to optimise or protect and simultaneously visually enhance your machine: from lamp guards to under-body sealant - from side stand plates to centre stands. Standing securely on any ground.
Our new LED additional headlamps also apply to the topic of safety - see and be seen better.
All of our protective and accessory items include a complete attachment kit with the necessary fittings and simple instructions.
Suitable for DIY attachment. Your motorcycle dealer would be happy to help you on site.

For all products:
- Specially developed for the respective motorcycle model, universal parts available for particular solutions
- Mounting kits with fittings
- Metal tube made of forged German steel with high quality powder coating, chrome plating or in stainless steel
- Comprehensive, simple instructions

LOCK-IT SYSTEM SIDE CARRIER

The functional side carrier

BMW R 1250 GS

Outstanding fit – every carrier is adapted precisely to the motorcycle model. This means that the carrier fits the motorcycle exactly. During design, all model-specific characteristics are considered, such as the helmet and seat lock, turn signals, exhaust pipe height, etc.
Manufactured from steel tube, which is reinforced with a special inner tube at heavily strained places. A special feature of the Lock-It side carrier is the ability to remove them in seconds.

- Removal in seconds with Lock-It screws
- Theft deterrence available with Lock-It lock
- Motorcycle's look not disturbed by removed bracket; retaining tabs that remain are unobtrusive.

It´s so easy:

1.Losen the lower screw

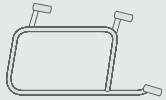

2.Losen the upper screw

3.Remove the complete rack

INFO

Symbol

Recommended load: 10 kg per side
Please follow the manufacturer's instructions

Effectively protects your removable Lock-It side case holder from theft. Just replace one of the Lock-It fastening screws on each side of the motorcycle with this lockable screw.

SIDE AND COMPLETE CARRIER FIRMLY BOLTED

The sturdy side carrier

HONDA CRF 1100 L Africa Twin

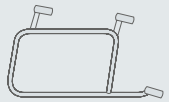

This type of side racks are firmly bolted to the motorcycle. Especially for Enduro-models, this is often the better choice compared to removable carrier systems when used in rough terrain.

A special form of the case carriers are the complete carrier, consisting of a side-mounted case carrier and a rear rack as a possible top case carrier. Both can only be mounted together.

Common to all versions is the solid construction made of precision steel tube, which is reinforced with a special inner tube at highly stressed areas.

TRIUMPH Bonneville

BMW R 1300 GS

HONDA XL 750 Transalp

EASYRACK

The support plate with foldable bracket for top case mounting

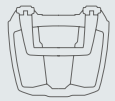

SUZUKI V-Strom 1000 ABS

Easyracks are specially design as a carrier for our top cases while looking sleek and sporty even when riding without a top case. Here is why: The bow, required for attaching the top case, disappears when not in use by folding into the Easyrack. It no longer spoils the motorcycle's look. Even sitting on the motorcycle is easier when you can fold the bracket down. Every Easyrack is developed for the specific model and fits beautifully into the motorcycle's overall look. Production from premium aluminum gives the rack great strength and an elegant look. The rack design integrates additional luggage with belt fastening points for attaching luggage rolls, etc.

INFO

ENLARGEMENT FOR REAR RACKS

Luggage plate for soft luggage

SUZUKI V-Strom 1050

Stable aluminum plate for extending almost any rear rack when loose luggage needs to be transported instead of top cases. Its raised edges and additional holding points make the extension ideal for carrying even larger luggage rolls, travel cases, tents duffels and more.

- Aluminum construction
- High strength, premium look
- Fastening options for luggage straps
- Available with attachment accessories
- Model-specific version or universal design for existing racks
- Deliverable in black and silver

Thanks to the identical hole pattern, the universal enlargement can be easily installed instead of existing Alu- or Easyracks. When used together with top loader side cases (e. g. Gobi, Xplorer) we recommend the small version of the extension.

C-BOW HOLDER BLACK

Holder for Hepco&Becker C-Bow luggage

HONDA CB 750 Hornet

The C-Bow is the perfect holder for side cases and bags. Its elegant, unobtrusive design fits perfectly into the bike's overall lines. It keeps the bags safely away from the hot exhaust muffler.
The C-Bow technology allows the bags to be attached simply and easily to the C-Bow with a single click, firmly locking them to deter theft.
The bags are attached securely to the motorcycle and stay in position even when loaded.
On many models, the turn signals stay in their original position.

Horizontal or vertical installation
This improves the seating comfort of the pillion rider space, if a side pocket is mounted.

LOCK-IT AND BASIC TANKRINGS

The technically perfect attachments for tank bags

basic

Practical – functional

The new Basic system is not only a practical solution for attaching tank bags and tail bags, but also offers a valuable alternative to the well-tested Hepco&Becker Lock-it system. The Basic tank ring locks your luggage into place securely and reliably via the conic dome, allowing you to concentrate fully on the road – and all at an unbeatable price. It allows you to quickly and easily attach your luggage and remove it again without wasting any time or energy.

- available for over 450 motorcycle models
- safe and convenient attachment through mechanical locking on plastic domes
- enables fast and uncomplicated fuelling of your vehicle without tedious straps
- tank bag can be attached and released without any physical effort due to tensile straps
- can be combined with optional theft protection
- suitable for many Hepco&Becker tank bags

Underside of a tank bag with matching counterpart to the tank ring

MagnetSystem Lock it FIDLOCK

Sophisticated – clever

Handling the tank bag has never been easier. The innovative Lock-it system makes attaching and removing the bag extremely easy. It saves you valuable time and enables you to quickly set off without any fiddling about.
One practical function of the Lock-it tank ring is the automatic centring. When putting on the tank bag, it is fastened magnetically and centred precisely. Sliding and shifting around is a thing of the past – you can enjoy a stable and secure attachment throughout the entire journey.

- available for over 450 motorcycle models
- easier centring function thanks to magnetic domes with mechanical load capacity of over 70 kg
- enables fast and uncomplicated fuelling of your vehicle without tedious straps
- tank bag can be attached and released without any physical effort due to tensile straps
- can be combined with optional theft protection
- suitable for many Hepco&Becker tank bags

Basic holder - Set
Item-no. 516100

UNIVERSAL TOP CASE FASTENING

Secure attachment for top cases

Your motorcycle may already have a rear rack. If that is the case, why not mount a Hepco & Becker top case? There are universal mounts for those wanting this solution.

You have the following three options:

1. H&B Top case models including universal pallet: Due to the boring pattern, this enables mounting on existing rack constructions of the manufacturer. Pallet and mounting material are included in the kit. The following topcases are available as a universal version: Journey TC 30/40/50 as well as the Orbit TC 54.
2. Universal Alu/Easyrack or Rear rack tube type construction: universal solution for carrying every Hepco&Becker top case. These products must be mounted on existing base carriers.
3. An assembly of a universal rack is not possible: Then you will certainly find a specific solution in our model list.

SPORTRACK

Carrier system for Soft Luggage

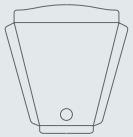

KAWASAKI Z1000 SX

The problem of luggage transport on sporty motorcycles with short rear ends is well known: How and where can the luggage be reliably secured?
Hepco&Becker has the right solution for this: the Sportrack. This is simply clipped into place instead of the passenger seat and is therefore securely anchored by using the original motorcycle key. The seat bench can be exchanged for the Sportrack without any tools if necessary. A further advantage: The baggage is placed directly behind the driver in a streamlined and centre-of-centre-optimised position.

INFO

Symbol

Recommended load: 7,5 kg.
Please follow the manufacturer's instructions.

Can be combined with C-Bow holder.

You will find an overview of the possibilities on the following pages.

KTM 1290 SUPER DUKE GT

Example with enlargement

DUCATI DesertX

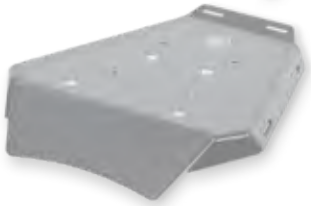

The substructure of each Sportrack is made of steel and galvanized for corrosion protection.

Overview of the possibilities

Each Sportrack has 4 additional holes that allow for luggage attachment - whether rear bags, enlargement or top case pallet. Furthermore, all sports racks have lashing slits which are conveniently designed for the individual attachment of bags or luggage rolls.

PROTECTION BARS

Engine and Tank guards - powder-coated

TRIUMPH Tiger 900 RALLY / GT / PRO

MOTO GUZZI V85

HONDA CL 500

Whether you ride more on rugged terrain, on country roads or in town, a Hepco & Becker guard is always the right choice. Your motorcycle is always effectively protected against an unexpected mishap. And even more: If the bike falls over or makes unintentional contact with the ground, it can protect both bike and rider from more serious consequences.
Hepco & Becker protection bars follow the lines of the bike perfectly, giving it a customized appearance. Made with extremely stable tube-in-tube construction. In addition, a protection bar is always a sensible purchase to avoid cost-intensive repairs, such as the replacement of fairing parts or motor housings. They also serve as a lashing point when loading the motorcycle. Thanks to the extensive, easy-to-understand instructions, assembling is also possible for non-specialists.

- Protection during pushovers or falls; helps when tying down the motorcycle
- Vehicle-specific design for perfect match and easy installation
- Tough tube-in-tube construction
- Premium powder coating in black, silver, or anthracite depending on model
- Complete, straightforward instructions

NOTE: Tank guards cannot be assembled alone - some new models only (see pictures) Generally, only possible with the Hepco&Becker engine guard for the appropriate motorcycle model.

SLIDEPAD

BARS WITH PROTECTION PAD

The new HEPCO&BECKER slidepad – does what it's made for!

Thanks to their sleek design and look, the new slidepads are a stylish way to upgrade your motorcycle.
They also protect the coated guard and the motorcycle in case of sporadic or grinding contact with the surface or the road. By reducing or preventing expensive damage to the motorcycle or saving you from potentially having to replace the guard, the slidepads make the crash guard even more effective.

The damping effect of the plastic with sudden forces in the event of a crash enables part of the impact energy to be captured and absorbed.

Only suitable for tank and engine guards with a tube diameter of 22 and 25 mm.

Whether you spend most of your time riding over difficult terrain, on country roads or along city streets; a crash bar from Hepco&Becker is always the right choice. Your motorcycle will have effective protection against unexpected mishaps at all times.
But more than that: In the event of a fall or unintentional contact with the ground, you can protect the motorcycle and the rider from serious damage. The crash bars are equipped with a shock-absorbing element with additional protection pads that can absorb energy to minimise damage. The load is also eased on the support and screw connection of the structure. In this specific version, a protection pad is integrated on each side to provide additional protection.

PROTECTION BARS CHROME

Only the best for your motorcycle

TRIUMPH Thunderbird 1600

MOTO GUZZI V7 II / III

Our protection bars are tailored to the motorcycle and give them an individual character. Additionally, the motorcycle is protected against smaller accidents and ground contact, the bars protect the bike and the driver from bigger damage.
The engine guards are made of polished, high shine chrome steel pipes. Using a pipe-in-pipe construction for better stability, every bar is developed for the specific bike and guarantees a perfect fit. The chrome prevents rust if taken care of properly. All guards are delivered with the neccesary fixing material and simple mounting instructions.

PROTECTION BARS STAINLESS STEEL

Stainless steel electropolished - design and function

BMW R 1300 GS

YAMAHA Ténéré 700

HUSQVARNA Norden 901

With passion and commitment, we took on the challenge of stainless steel and fully mastered it.
Our stainless steel series offers you more ways to upgrade your motorcycle with Hepco & Becker products. Those who love stainless steel will make a great find among our cross-brand offerings, and will get a high-quality, very durable premium product. When it comes to protecting a motorcycle, stainless steel products have obvious advantages.
The blasted, electropolished surface ensures a visually and technically excellent finish, and makes the guard more resistant to rust. Your bike has an upgraded design, look and feel, and it is protected against damage to the fairing or engine. From an ecological point of view, stainless steel is much more environmentally friendly than other common materials, such as aluminum or carbon, and is even 100% recycable.

Available for many models.

FRONT-/REAR PROTECTION BARS

For complete all-roand protection

BMW F 900 R

HONDA CB 750 Hornet

For selected motorcycle models of the 125 to 850 class, which are frequently used in driving schools, we offer protection bars which protect the front or rear of the motorcycle. The protection bars offer good protection against falling even at low speeds and can be combined with the model-specific Hepco&Becker engine and tank guards. Depending on the motorcycle model, these are available in the coating colours black or anthracite. Very good stiffness values of the stirrups are achieved by increased wall thicknesses and the pipe-in-pipe construction.

- Provides protection in case of accidents and falls
- Turn signals, clutch and brake levers, mufflers, fairings,etc. are efficitively protected, with limited pillion passenger
- Reinforced tube-in-tube construction, powder-coated

FARI SUPPLEMENTARI NOVA LED

Set off on an evening adventure with the Nova led additional headlights

The provisions for attachment vary from country to country. Please inquire about the applicable legislation in your country.

NOVA LED ADDITIONAL HEADLIGHTS (Set) Item-no. 731107

Hanging mounting example (downwards)

Aluminium housing with protective screen

These additional headlights are fitted with a robust, powder-coated aluminium housing and offer two switching stages for different light intensities and colour temperatures. The universal attachment fits onto tubes with a diameter of 18 mm to 25 mm, either standing upwards or suspended downwards. Installation is easy and is done via battery, without any connection to the vehicle wiring harness.
A special control unit and illuminated switch protected against splashing water ensures that you remain in full control. Ready for every adventure, the Nova LED additional headlights are your faithful companion for breaking through the darkness and lighting up new horizons. Gear up for some exciting nights on the road!

DETAILS:

- Solid aluminium housing, powder-coated with protective screen
- Two switching stages at 2,500 lm
- Universal attachment to tube with diameters of 18 mm to 25 mm either standing (upwards) or suspended (downwards)
- Connected via battery, no connection to vehicle wiring harness required
- No external operation by third parties thanks to special control unit with automatic voltage control
- Illuminated switch protected against splashing water
- ECE-tested and approved
- Water- and dust-protected in line with IP67

CENTER STANDS

For maintenance, fill-up, winter storage - simply practical

YAMAHA MT-09

Hepco & Becker center stands are extremely rugged and don't get in the way of your riding. The tension springs are made of stainless steel. Sophisticated geometry and anti-skid tread make it easy to stand your motorcycle securely in any situation. The precisely manufactured stands are very stable, sandblasted, black powder coated, and hold their value. Naturally, they're approved for the street. Center stands make maintenance easier and keep the bike stable, during fill-ups, for example. During winter storage, they take a load off the rear wheel.

REAR RACK ENLARGEMENT FOR HANDBAGS	
polished and anodized	800000 00 09

SPECIAL NOTES
For leather bag holder tube type only.

Versions for self-mounting

Leather bags for saddle bag holder - fixed mounting for self-assembly
Self-assembly version with fastening set for fixed mounting on the saddlebag holder (saddlebags cannot be removed). Holes must be drilled in the back of the saddlebag.

Fixed mounting fastening Self-assembly	700429	piece

Leather bag for leather bag holder – optional with quick lock for home installation
Another option when using a bag holder is our quick lock at additional charge for home assembly. This allows the leather bag to be removed from the bag holder at any time. Moreover, the lock works from inside the bag, securing the bag from theft. Home installation is very difficult.

quick lock home installation	700403	piece

Versions fixed and ready assembled

Leather bag for leather bag holder - optional with quick lock installed at the factory
Another option when using a bag holder is our factory-installed quick lock. It allows the leather bag to be removed from the bag holder at any time. The lock also locks inside the bag to prevent theft. The
leather bag and bag holder have to be ordered together and installed in pairs.

quick lock incl. factory installation	700402	piece

NOTE: For all versions, the leather bag matches only the bag holder it is attached to. Once the quick locks are installed, a leather bag can no longer be returned.

C-Bow leather bag for C-Bow leather bag holder
We recommend the leather bag's C-Bow version (if a C-Bow holder is offered for your motorcycle). This requires no home installation and switching the model to a different motorcycle with C-Bow is no problem.

CANISTER CUTOUT SET

34	Please specify if a backrest is available.
35	Rear rack not suitable for topcase; compatible with original sissybar.
36	One-sided side carrier.
37	For model without Honda original rear rack.
38	Turn signals included.
39	For model with cast wheels.
40	For model with spoked wheels.
41	Only in combination with modified tank guard 502994 (Please observe mounting instructions).
42	For model with double exhaust system.
43	For model with 4in1 exhaust system.
44	Not in combination with original auxiliary headlights.
45	For model with small tank.
46	For model with Sebring exhaust system.
47	In combination with original side carrier.
48	Only in combination with original sissybar.
49	Symmetrical complete side carrier/ side carrier for model with 2in2 exhaust system.
50	In Germany, registration (individual approval) is required at the TÜV.
51	Rear rack cannot be combined with BMW original carrier.
52	Luggage carrier instead of the pillion seat.
53	Side case GOBI and top case GOBI cannot be mounted together.
54	Rear rack suitable for one-man seat. Suitable for top case.
55	Combination of Xplorer side cases with Xplorer TC60 is not possible.
56	Can be combined with original cases.
57	For model with single-sided swing arm.
58	For model with double swing arm.
59	Sissybar/Solorack can be combined with H&B side carrier and C-Bow holder for this model.
60	Sissybar can be combined with H&B side carrier for this model.
61	Not suitable in combination with 5014564
62	For model with two-man seat.
63	Not compatible with original BMW topcase plastic adapter.
64	Cannot be combined with 6542535! Can only be combined with 6532535 00 02.
65	Not mountable alone, only in combination with H&B engine/tank guard for this model.
66	Can only be fitted with or on the side carrier 6532535 00 02.
67	Twinlight set for models with windshield.
68	Not combinable with original side carrier / side cases!
69	Mounting instead of the original rear rack.
70	Model from 08/09 on with welded footrests.
71	Rear rack only suitable for top case with universal adapter plate (610089, 610087 or 610206).
72	Mini rear rack only suitable for luggage rolls / bags. No topcase mounting possible!
73	Alurack available as optional accessory for topcase mounting.
74	Cannot be combined with original Yamaha engine guards. Adapter kit 700007408 required.
75	Using Xplorer side cases with Xplorer Topcase: Side case lid cannot be opened.
76	Engine guard (502404) cannot be mounted if the original skid plate is mounted.
77	Alurack, Easyrack or rear rack with C-Bow holder cannot be combined.
78	Specify which footrest system (black or silver) is installed.
79	Not for lowered version.
80	Not suitable for model with long seat.
81	Not suitable for model with short seat.
82	Also suitable for use with the original windshield or short windshield.

GENERAL / SPECIFIC NOTES

83	Can only be mounted in combination with original hand protector.
84	Max. payload 3Kg
85	Pillion handle not applicable.
86	Can also be combined with original rear rack.
87	Legacy courier bag L / Xtravel only possible in combination with vertical C-Bow shifting.
88	Can be combined with original side carrier.
89	With bags mounted, pillion passenger suitability is limited
90	Alu Standard side case cannot be combined with top case.
