#### Resistors Kit

Code	Resistor
EE149H	3W - 38 Ω

Rizoma indicators come standard with a pair of resistors.  
To avoid errors in bikes equipped with a control indicator on the dashboard, we recommend installation of the resistance kits EE149H (3 W - 38 Ω)

#### Electronic Signal Flasher kit

Code
EE031H

Our technicians recommend the replacement of the original (OEM) relay with our EE031 in correspondence of the mounting of Rizoma indicators when four indicators are replaced. This will maintain the correct flash rate as the original system albeit with different Wattage. Use of the EE031 eliminates the need to use individual resistors.
